

► THE CHALLENGE

ISO certification is a complex, sensitive and admin-heavy process.

Companies have to rely on certification consultants and vendors to ensure successful ISO certification. With so many criteria involved, preparing for certification can be time consuming and costly, not to mention risky; costly administration errors are always a worry.

Considering these challenges, a system to evolve the process, and empower companies, is not only beneficial, it's necessary.

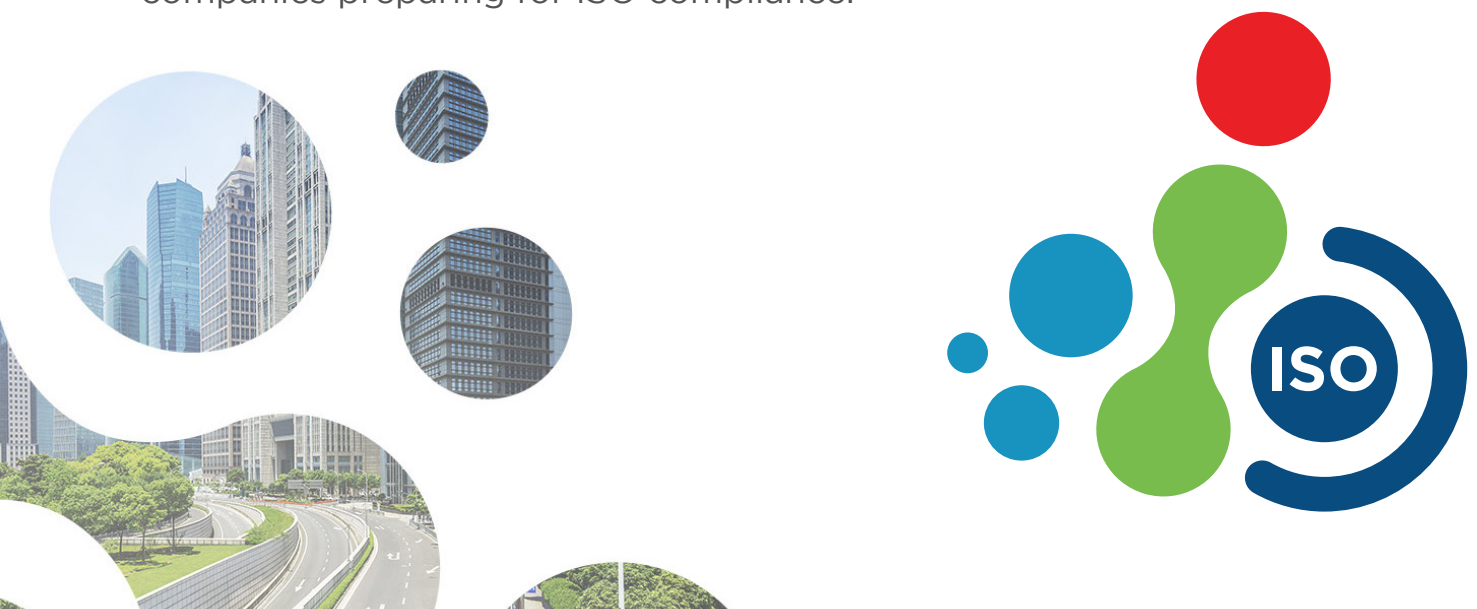

► THE SOLUTION

A comprehensive digital platform to prepare for certification.

intu-it ISO is a comprehensive, intelligent digital platform designed for companies embarking on the ISO certification process. Accessible on multiple devices, it no longer restricted to the diaries of busy consultants for preparation analysis.

Through structured questions and a simple point and click format, intu-it ISO supports companies in the critical stage of compliance analysis. Information is accessible when it's needed most and compliance needs are recorded in real time, automatically populating reports.

intu-it ISO is made to address the challenges faced by companies preparing for ISO compliance.

Certification, simplified.

▶ THE BOTTOM LINE

Reduces turnaround time.

By minimising the time needed to conduct integral aspects of the certification process, intu-it ISO supports companies. It reduces the chance of errors by decreasing the administration burden altogether.

Because intu-it ISO addresses the challenges that come with certification, intu-it ISO is the perfect digital platform for companies that are serious about compliance.

BENEFITS

- Easily complete a gap analysis and access a digital compliance advisor to check if you are ready for ISO certification.
- Access reports that detail your company's ISO and compliance gaps immediately after completing the questions.
- Helps you to be 'more prepared' for an ISO audit by highlighting your gaps and compliances.
- You can potentially save time and costs during the process of certification through self-diagnosis.
